

Ideal for total health systems support

Managed training services

Ideal provides a range of training services to support all aspects of health systems training from initial training needs analysis through to post training evaluations.

Flexible solutions

At Ideal, we offer clients the flexibility to select specific aspects of our training services, or a complete managed training solution.

Extensive experience

Through our extensive experience of working with Trusts and health communities, we can help your training programme run smoothly, effectively and on time by helping you avoid the pitfalls that can occur in large training projects.

Maximum benefit

Our professional training project managers, trainers and support staff

are aware of the key factors and resistors affecting the successful delivery of training programmes.

This valuable experience allows clients to gain maximum benefit from the training and encourages staff to embrace new systems from a position of confidence in their new skills.

Working in partnership

Ideal has partnered with many NHS Trusts and other healthcare providers to ensure the successful delivery of their training programmes.

We establish effective partnerships with our clients and work together with them to deliver efficient and cost effective solutions that protect their return on investment.

Measurement and reporting

As part of our managed training service we offer a project measurement and reporting service.

This provides the facility to evaluate the effectiveness of the project against set benchmarks including Knowledge Skills Framework (KSF), Skills Framework for Information Age and Kirkpatrick to level 5.

Our managed training services

Ideal offer a full portfolio of health systems training services, including:

- Training needs analysis (TNA)
- Skills gap analysis
- Competency mapping
- Training project management
- Post training evaluations
- Management reporting
- Training administration
- Course localisation
