

Health systems training

Ideal offers a range of truly flexible health systems training solutions. We work in partnership with healthcare providers to develop individual health systems training solutions to satisfy specific requirements. Ideal can provide a complete managed health systems training service or assist with individual health systems training demands.

At Ideal we work with our clients to identify and resolve capability and capacity shortfalls to enhance health systems projects and support further staff development. By concentrating exclusively on the healthcare sector, we have developed a team of professionals with in depth healthcare knowledge and experience. We understand the challenges presented by health systems training projects and can respond quickly and effectively to changing demands.

Our training services include:

- Health systems trainers
- Training courses
- A range of additional training services

Health systems trainers

Ideal provides a high quality and cost effective means of delivering health systems training throughout the UK. Ideal is accredited by the Institute of IT Training and by the NHS Connecting for Health to provide health systems training. We have been selected as part of the London Health Training Pool and are accredited by the Southern Programme for IT under the TPAS scheme.

Our nationwide team of health systems trainers have experience in a wide range of healthcare systems including Care Records and Primary Care systems. Some of the systems we provide training on are Cerner, RiO, iSoft, PACS and many more.

Training courses

Ideal offers a wide selection of training courses covering health systems and health informatics skills. Our courses are designed for all staff involved in managing, supporting and using healthcare systems and can be customised to meet individual requirements.

Managed training service

Through our managed health systems training service we provide a range of services to support all aspects of training projects including:

- Training needs analysis
- Training project management
- Training administration.
